

PROCESS DEVELOPMENT IN THE HYDROCARBON
SYNTHESIS TO 1941

by

S. Kodama,^{1/} W. Funabashi,^{1/} G. Hashimoto,^{1/}
T. Hirao,^{1/} H. Tahara,^{1/} A. Matsumura,^{1/}
J. Kato,^{1/} and Y. Tarama^{1/}

(Revised and Edited by Robert C. Grass^{2/})

CONTENTS

	<u>Page</u>
Preface.....	1
Abstract.....	2
Acknowledgments.....	2
Introduction.....	3
Important aspects of plant design.....	4
Inner-catalyst converter (100 l./hr.) using oil as a coolant.....	6
Description of equipment.....	6
Catalyst.....	7
Synthesis operation.....	7
Inner-catalyst converter (10 m. ³ /hr.) using oil as coolant	8
Description of equipment.....	9
Synthesis operation.....	10
Outer-catalyst converters using oil as coolant.....	10
Converter with 3 m. ³ /hr. throughput.....	10
Description of equipment.....	10
Synthesis operation.....	11
Converter with 10 m. ³ /hr. throughput.....	11
Description of equipment.....	11

^{2/} Research chemist, Research and Development Branch, Office
of Synthetic Liquid Fuels, Bureau of Mines, Bruceton, Pa.

CONTENTS (Continued)

	<u>Page</u>
Outer-catalyst converters using water as coolant.....	12
Converter with 6 m. ³ /hr. throughput.....	12
Description of equipment.....	12
Synthesis operation.....	14
Converter with 100 m. ³ /hr. throughput.....	14
Description of equipment.....	14
Experimental procedure, cobalt catalyst.....	14
Synthesis-gas preparation.....	14
Production of components, CO and H ₂	14
Purification and formulation of synthesis gas.....	16
Catalyst.....	17
Synthesis operation.....	18
Discussion of results.....	19
Experimental procedure; iron catalyst.....	27
Synthesis-gas preparation.....	27
Production of components, CO and H ₂	27
Catalyst.....	30
Synthesis operation.....	31
Discussion of results.....	36
Calculation of heat-transfer data.....	38
Summary.....	40

ILLUSTRATIONS

	<u>Follows page</u>
Fig. 1. Flow diagram (100 l./hr. inner-catalyst converter).....	6
2. 25-mm. I.D. inner-catalyst converter.....	6
3. 35.7-mm. I.D. inner-catalyst converter.....	6
4. 55-mm. I.D. inner-catalyst converter.....	6
5. Flow diagram (10 m. ³ /hr. inner-catalyst converter).....	8
6. Organic-sulfur remover (10 m. ³ /hr. inner-catalyst converter).....	8
7. 10 m. ³ /hr. inner-catalyst converter.....	8
8. Detailed construction of figure 7.....	8
9. Equipment on downstream side of 10 m. ³ /hr. inner- catalyst converter.....	8
10. Lamont boiler.....	8
11. 3 m. ³ /hr. outer-catalyst converter.....	10
12. 10 m. ³ /hr. outer-catalyst converter.....	10
13. Proposed outer-catalyst converter (tube centers 58 mm. x 51 mm.).....	12
14. Proposed outer-catalyst converter (tube centers 43 mm. x 37.5 mm.).....	12
15. Hot-water circulation apparatus (6 m. ³ /hr. outer- catalyst converter).....	12

ILLUSTRATIONS (Continued)

<u>Fig.</u>		<u>Follows</u>
		<u>page</u>
16.	Hot-water drum (6 m. ³ /hr. outer-catalyst converter)	12
17.	6 m. ³ /hr. outer-catalyst converter.....	12
18.	Detail of water-coolant pipe bends.....	12
19.	Hot-water drum, hot-water circulating pump, and 6 m. ³ /hr. outer-catalyst converter.....	12
20.	General view of 100 m. ³ /hr. pilot plant.....	12
21.	100 m. ³ /hr. outer-catalyst converter (original design).....	14
22.	100 m. ³ /hr. outer-catalyst converter (as con- structed).....	14
23.	Flow diagram of pilot-plant process.....	14
24.	Gas-meter assembly: (left to right) H ₂ , water gas, synthesis gas, exit gas, gasol.....	14
25.	Wet-type gas desulfurizer: left, washing tower; right, tower for reactivating desulfurizing solution.....	14
26.	Apparatus for removing organic sulfur.....	16
27.	Diagram of sulfur-removal system.....	16
28.	Temperature distribution in sulfur-removal furnace.	16
29.	Instrument panel.....	18
30.	Water-cooled reactors: foreground, 6 m. ³ /hr. unit; background, 100 m. ³ /hr. unit.....	18
31.	Heat exchangers: left, Diesel-oil cooler; right, gasoline cooler.....	18
32.	Foreground, Diesel-oil separators; background, activated-carbon tower for adsorbing light oil...	18
33.	Thermocouple locations in 100 m. ³ /hr. converter....	20
34.	Operating data for experiment 18.....	30
35.	Yield data for experiment 18.....	30
36.	Co and Fe catalysts; experimental results.....	36
37.	Proposed flow diagram for recirculating tail gas...	38
