UNITED STATES DEPARTMENT OF THE INTERIOR
Douglas McKay, Secretary
BUREAU OF MINES
J. J. Forbes, Director

Work on manuscript completed February 1955. The Bureau of Mines will welcome reprinting of this paper, provided the following footnote acknowledgment is made: "Reprinted from Bureau of Mines Report of Investigations 5137."

July 1955

SYNTHESIS OF METHANE

by

Murray Greyson,^{1/} J. J. Demeter,^{2/} M. D. Schlesinger,^{2/}
G. E. Johnson,^{2/} James Jonakin,^{3/} and J. W. Myers^{4,5/}

CONTENTS

	<u>Page</u>
Summary	1
Introduction	1
General	2
Chemistry and thermodynamics	3
Experimental program	17
Experimental procedures	18
Criteria of catalyst and process evaluation	18
Synthesis gas	19
Gas analysis	19
Catalysts: Preparation and pretreatment	19
Fixed-bed testing	20
Equipment description	20
Operating procedures	23
Results	23
Discussion	26
Fluidized-bed testing	26
Conventional bed	26
Equipment description	26
Operating procedures	29
Results of iron-catalyst tests in conventional bed ..	31
Discussion of iron-catalyst tests in conventional bed	34
Results and discussion of nickel-catalyst tests in	
conventional bed	38
Multiple-feed bed	40
General	40
Equipment description	40
Operating procedures	43
Results of nickel-catalyst tests in multiple-feed bed	46
Discussion of nickel-catalyst tests in multiple-feed	
bed	49
Conclusions	50

^{1/} Physical chemist, Bureau of Mines, Pittsburgh, Pa.

^{2/} Chemical engineer, Bureau of Mines, Bruceton, Pa.

^{3/} Chemical engineer, Bureau of Mines, Pittsburgh, Pa.

^{4/} Chief, Combustion Research Section, Bureau of Mines, Pittsburgh, Pa.

^{5/} In preparing this report the authors were assisted by J. F. Skultz and his staff who handled the fixed-bed testing phase of the work, F. J. Schoeneweis who prepared catalysts, A. J. Sharkey who made the mass-spectrometer analyses, M. E. Kundick who made chemical analyses of catalysts and products, and Mrs. W. Peebles who made X-ray analyses of catalysts.

TABLES

	<u>Page</u>
1. Fixed-bed experiments	24
2. Sieve analysis of iron-catalysts	31
3. Fluidized-bed iron catalyst evaluation	32
4. Effects of recycle ratio and steam addition at constant total space velocity	34
5. Catalyst L-6025, conventional bed	39
6. Fluidized-bed-catalyst evaluation	47
7. Product-gas analysis, catalyst L-6053	48
8. Catalyst changes during processing	48
9. Thorium-promoted nickel-alumina catalysts	49
