Abstract

Research on synfuels processes at Sandia National Laboratories emphasizes the chemistry and physics of in situ processes for coal gasification and oil shale, and direct liquefaction processes for coal. Research encompasses modeling, laboratory studies, field testing and diagnostics development.

This bibliography lists publications, abstracts and sources documenting the research results for calendar years 1978 through 1982. All papers are available, either from the National Technical Information Service for Sandia documents or from the journals of publication.

CONTENTS

	<u>Page</u>
I. <u>Coal Gasification</u>	1
A. Chemistry.....	3
B. Processes.....	5
C. Instrumentation.....	9
D. Program Summaries/Project Reviews.....	17
II. <u>Oil Shale</u>	19
A. Bed Preparation.....	21
B. Instrumentation.....	27
C. Chemistry and Physics of Retorting.....	31
D. Program Summaries/Project Reviews.....	41
III. <u>Coal Liquefaction</u>	45
A. Catalysis.....	47
B. Chemistry.....	53
C. Properties (density, characterization, thermal conductivity).....	59
D. Processes.....	61
E. Instrumentation.....	63
F. Program Summaries/Project Reviews.....	65
IV. <u>Author Listing</u>	75
V. <u>Chronological Sandia Publication Listing</u>	87

SPECIAL INSTRUCTIONS

Sandia National Laboratories does not distribute copies of the reports shown in this summary. For reports not published in journals, you should write to the following address and ask for your report with reference to author, title, document number and date:

National Technical Information Service
U. S. Department of Commerce
5285 Port Royal Road
Springfield, Virginia 22161

Microfiche copies of reports from NTIS are \$3.50 each. The price for printed hard copies varies with the page count of the report. NTIS also distributes the Government Reports Abstracts Index periodically to subscribers.

For those reports published in journals, please request copies from your library or by writing and requesting from the appropriate periodical or journal.
