INTRODUCTION	
I. <u>FISCHER-TROPSCH SYNTHESIS</u>	I-1
A. Catalyst development	I-1
1. Cobalt catalysts	I-1
2. Iron catalysts	I-2
α. I.G. Farbenindustrie A.G., Oppau	I-2
a. Fused oxide catalyst	I-3
b. Knead catalyst	I-4
c. Sinter catalyst	I-4
d. Precipitation catalyst	I-4
β. Kaiser Wilhelm Institut für Kohlenforschung, Mülheim/ Ruhr	I-6
γ. Metallgesellschaft Lurgi, Frankfort a/M.	I-7
B. Processing	I-11
II. <u>THE FORMYLATION PROCESS (OXO-PROCESS)</u>	II-1
A. Introduction	II-1
B. General considerations	II-2
C. Information on the processing at Ludwigshafen	II-4
D. Information on the processing at Oppau	II-8
1. Laboratory studies	II-8
2. Splitting hydrogenation of thick oil	II-11
3. Semi-scale experiments	II-12
E. Kinetics of the Oxo-reaction in relation to the constitution of the alcohols formed	II-13

	Page
F. Various applications of Oxo-alcohols	II-15
1. General information	II-15
2. Application of Oxo-alcohols for the preparation of plasticizers	II-16
G. The chemistry of cobalt carbonyls	II-20

III. PREPARATION OF HYDROGENATION CATALYSTS III-1

ADDENDUM I - Das Oelkreislaufverfahren zur Erzeugung von Kohlenwasserstoffen aus Wassergas

ADDENDUM II - Bericht No. 2001, 2.1.1946 von Dr. Nienburg, Ammoniaklaboratorium Oppau, Oxo-Arbeiten 1940-1944

ADDENDUM III - Niederschrift über die Besprechung der Analytik der Produkte des Oxoverfahrens.
