

SUBJECT

Introduction	1
Winkler Generator Installations	3
Historical	3
Characteristics of "Boiling" Beds	6
Description of the Process	6
Oxygen Plants	7
Fuel Sizing and Storage	7
Properties of Fuel	7
Grates and Generator Base	8
The Fuel Bed	10
Composition of the Blast	11
Secondary Oxygen	12
Generator Brickwork	13
Waste Heat Recovery	13
Dedusting of the Gas	14
Starting up	17
Instruments and Safety Devices	17
Pressure Survey	18
Output	19
Service Requirements, Efficiencies and Balances	20
Material Balance at Zeitz	21
Heat Balance at Zeitz	22
Material Balance at Leuna	23
Heat Balance at Leuna	24
Manufacture of Power Gas	25
Material Balance at Leuna (Power Gas)	26
Heat Balance at Leuna (Power Gas)	27
Manufacture of Ammonia Synthesis Gas	28
Use of Fuels other than Brown Coal	28
Miscellaneous Points of Interest	29
Comparison with other Processes for Making Synthesis Gas	30
Capital Costs	31
Process Labour and Maintenance Costs	31
References	37

LIST OF TABLES

Table I	- List of known Winkler Installations	3
Table II	- Summary of Design of Winkler Generators making Water Gas	32
Table III	- Performance of Winkler Generators making Water Gas from Grude	33
Table IV	- Performance of Winkler Generators making Water Gas from Dry Brown Coal	34
Table V	- Performance of Winkler Generators making Power Gas	36
