

## Technical Reports and Foreign Documents

### Synthetic Liquid Fuels Abstracts

Compilation of Synthetic Liquid Fuels Abstracts has been continued in the bimonthly form, and approximately 1,000 copies of each issue are supplied to the mailing list. Many new requests for the abstracts and for the cumulative index of volumes I and II (new series) have been filled. A comprehensive coverage of current literature and patents is being maintained. Indexing of foreign documents was continued, including separate documents in 25 FIAT reels, which were later transposed to TOM reels 281-305. All documents in these files, except those in TOM reels 1-279, of special interest to the synthetic liquid fuels program are now subject indexed.
