

SUBJECT INDEX

A

	Item
Abel-Pensky flashpoint testers, Bureau of Mines study	80
Abietic acid, in bituminous coal, detection	3011
Abrasives industry, technological advances	8113
Absenteeism, coal industry, problem	6746
Absorbents, sodium pyrogallate solution, for oxygen testing, methods	4110
Absorbers, agitator, for carbon dioxide	2473
multicomponent, packed columns for	6368
Absorption, air and natural gas, in crude petroleum	2020
benzene, by body tissues and fluids, tests on dogs	1926
carbon dioxide by amines	6940
uses by hot carbonate solution	2683
by potassium carbonate solution	627
by tetramine	628
by triethanolamine	3689
condensation coefficient	3689
electronic, bituminous vitrain	1138
extraction of gasoline from natural gas by	2730
HF sound, in oxygen-water vapor and oxygen-ammonia mixtures	1058
monochromatic X-ray, for determining sulfur in hydrocarbons	5773
Nesbitt bottle, modifications	2010
oxygen, by oil-well drilling muds	2090
rock, by electromagnetic induction and radiation	6930
Absorption column effluent streams, continuous stripper for	2137
Absorption spectra, asphaltene	3795
ultraviolet	2727
visible	2737
Accidents, absence, in Bristol mine	2737
blasting, causes	8116
prevention, methods	779
blasting cap injuries, small mines	2627
coal-mine, annual review	4856
human factor	2170
prevention	5937
report	326, 6499, 7921, 8176
reduction, role of safety equipment	7794
relation of miner's age	3391
unusual, causes	9353
coal-mining industry, economic relation	3371
effect of mechanization	5514
prevention	3295
coke oven, annual review	5935
cyanidation plants, prevention	2167
data	6039
disabling, effect of age and occupation	9, 10, 70, 282
Experimental mine prevention, studies	5312
explosions, prevention	6435
explosives, in geophysical exploration	3822
falls of persons, small mines	3271
falls of rock, small mines, prevention	1753
prevention	4856
report	4860
flammable liquids, prevention	8155
flotation plants, prevention	7794
handtool, in small mines	4438
haulage, in small mines	8036
prevention	7102
program	7104
hoisting, in small mines	4403
Industrial, prevention, problem	4402
relation to fatigue	4855
mechanical hazards, in small mines	6340
mine, causes	6795
safety improvement, research	7162
cost, comparison with prevention cost, discussion	50, 52
data	7826
elimination, Bureau of Mines viewpoint	2625, 7090
hoisting shaft	2165, 2173
prevention	2616
by roof bolting	8329
costs	25, 287, 1831, 2179
by safety education	7705
cooperative research, American and British governments	7706
use of rock dust	2834, 2637
responsibility	6421
safety improvement, research	3372
statistics, relation to safety engineer, discussions	73
	7826
	2176, 2178

	Item
Accidents, mine, standardization	2177
understanding English language	2168, 2172
mine cars	5450
mine equipment, study	3396
mining industry, rates	260
oil fields	5337
prevention	8369
pellet powder, data	3376, 7751
petroleum industry	2651
prevention	3829, 5449, 6006
chemical aspects, committee report	3863
opportunities	3583
progress	7839, 7890
safety equipment	3346
proneness to	3339
quarry, elimination	8420
reduction	6451
by improving health of workers	6777
physical examinations	6788
relation to classes of employees, importance	3582
shaft, prevention	1831
role of carelessness	4571
slope, role of carelessness	4572
small mines, annual review	4962
statistics, National Safety Council	1339
relation to operator	2164
use, discussion	3381
Accident records, petroleum, review	2658
Accident reports, value of information	6470
Acetaldehyde, oxidation	3184
Acetal-type compounds, mass spectrum	2760
Acetone, action of phosgene on	5219
Acetone, decomposition	4218
electroreduction to propane	3026
Acetone binary mixtures, decomposition	4218
Acetone-ethyl alcohol-benzol-furfural mixtures, flammability	4109
Acetone-quartz system, electrokinetic relations	4879
Acetylene, effect on oxidation of hydrocarbons, formation	7019
in thermal decomposition of hydrocarbons	7458
in trinuclear cobalt complex	8169
reaction with liquid anhydrous ammonia	1457
synthesis, pyrolysis of methane	7606
vapor pressure, effect of temperature	1045
Acetylene-air-methane mixtures, flame temperatures	4128
Acetylene and dicobalt octacarbonyl, metallo-organic complex from	7444
Acetylene dicobalt hexacarbonyl, carbon monoxide addition, results	7446
Acetylene-iron carbonyl, bridged iron complex from	8249
Acetylene-oxygen furnace, high temperature	8353
Acetylene-oxygen industry, hygiene, studies	5823
Acetylenic compounds, reaction under hydroformulation conditions	8071
Acetylenic dicobalt hexacarbonyls, revived from alkynes and dicobalt octacarbonyl	8089
Achotta chloridizing mill, discussion	5826d
Acids, in coal mine water, determination	7141
Acids, organic, from oil shale, n-butyl esters, constitution	6605
Acid-base, titration, error, theory	6654, 8635
Acid catalysts, with pinacol, oxo reactions, chemistry	8241
Acid formation, prevention, sealing old mine workings	4890
Acid leach liquor and pulps, separation of uranium from, solvent extraction	6080, 6085a
Acid mine water, drainage	568
stream pollution	4673
Additives, use, corrosion in steam generators, prevention	877
Adiabatic calorimeter shield control, automatic, description	8684
Adirondacks, northeast, magnetite deposits, anhydrite red gypsum in	8649
Adobe shot, on boulder, use of TNT	7740
Adsorbents, oil refining, properties	1884
Adsorption, by alumina, analysis of petroleum aromatics	5067
electrolytes, effect on monodisperse clay-water systems	7394
flotation reagents, application, discussion	1753
liquids, by granular desiccants	7381
improved vessel	153
liquid-phase, surface-area measurement of clay and sedimentary rock by	4667

Item	Item
Adsorption, nitrogen compounds, separation from shale oil.....	7360
nonionic detergent, by radiotracer, spectrophotometric, and surface-tension methods, comparison.....	3838
polyoxyethylated detergents, on quartz.....	1940
pulverized coal surface, determination, discussion.....	6663
shale oil distillates, analysis, by displacement techniques.....	1880
shale oil naphtha, on silica gel, analysis.....	1874
vapor, by alumina gel.....	6114
water, on carbon black.....	2101
on clay.....	4045
Aeration, in flotation cells, measurement.....	2890
Aerial maps, improved, aid to geologist and engineer.....	6500
Aerial tramways, in metal mining industry.....	5312
Aerodynamics, high-speed, combustion calculations, methods.....	874
liquids and liquid solutions, properties.....	6531
Aerosols, flocculation, by high-frequency sound.....	6727
particle-size, determination.....	1140
Age hardening, copper-manganese-nickel alloys.....	1776, 1780
Agglomerate concentration, nonmetals.....	6229
Aggregates, burned shale, Pittsburgh district.....	3873
lightweight, annual review.....	3879
for concrete.....	6260
manufacture.....	1376
production.....	3964
clay as source, patent.....	4473
southern clay as source, tests.....	4476
waste slate as source.....	1372
metallic crystal, theory.....	1787, 5108
mineral, industry stabilization.....	7677
production, relation to motor-truck transportation.....	2896
shipments, data.....	3861, 3865, 3897
statistics.....	1397, 3872, 3886, 3887, 3892-3894, 3899, 7660
Aggregate industry, lightweight, scope.....	3881
log washers in, discussion.....	7979
Agitator absorber, for carbon dioxide.....	6388
Air, bacteria in, enumeration; value of methods.....	6003
canned, description.....	3153
carbon monoxide in, determination, by pyrotannic acid method.....	6843
compressed, breaking coal.....	3659
coal mine, methane in.....	8532
coal mine entries, resistance to flow.....	6038
control, effect on stoker performance.....	6078
dust in, bituminous coal mines, limits.....	5810
determination.....	2635
by Konimeter, comparison with sugar tube, Palmer apparatus, and impinger determinations.....	4294
by dust counter and Konimeter, comparative tests.....	4282
by Palmer apparatus, efficiency.....	2470
by sugar tube method, efficiency.....	2472, 4282
instruments for, comparative tests.....	4296
estimation; atmospheric, methods.....	6822
in drilling, observations.....	3328
in granite cutting plants.....	4286
elimination of carbon monoxide from blood with.....	6831
entrainment, in gas burners.....	8078
Experimental mine, ventilation of vehicular tunnels, test details.....	5033
flammability.....	7073
for combustion of coke, requirement.....	3746
gasoline vapor in, determination.....	1039
hydrocyanic acid gas in, test for.....	4281
hydrogen sulfide in, explosibility.....	4134
in crude petroleum, absorption.....	1926
in furnace heating, oxygen enrichment.....	900
in water vapor-nitrous oxide mixtures, determination.....	1033
methane in, oxidation, activity of metal catalysts in.....	6338
methyl chloride in, determination.....	6001
mine, cooling, possibilities and limits.....	6335
flow.....	5029
hazards, detection.....	6747
oxygen deficiency, changes in blood chemistry.....	6935
oxygen-enriched, effect in roasting zinc ores.....	5820
preheated; effect on overfeed and underfeed fuel beds.....	5719
still, effect of temperature on work.....	3812
toxic substances in, breathing, permissible limits, interpretation; zirconium in, heating, effect.....	6918, 3483
Air analyzer, ceramic powders, size distribution determination.....	6651
Air and gasoline vapor, flammable limits.....	1030
Air and helium, use in safe traveling.....	5411
Air compression costs, study.....	4251
Air conditioning, heat and moisture losses from human body, prevention.....	3810, 3813
summer, comfort, discussion.....	6815
Air conditioning chart; all-pressure, description.....	5027
Air currents, metal mines, reversibility.....	3343
return, decay of timber in, metal mines.....	3290
Air current regulator, description, discussion.....	5034
Air-dioxan mixtures; explosive properties.....	4131
Air-ethylene flames, on cylindrical burner ports, lifting and blow-off.....	8339
Air filter samples, air pollution, measurement methods.....	4636
Air flotation, refining of kaolins, Pacific Northwest.....	8366
Air-fuel mixtures, ignition by hot gases, application to firedamp explosions.....	8378
Air gap, between cartridges of explosives, propagation of detonation across.....	6009
production of Neumann bands, explosion system, effect.....	2582
Air-gas flow, through porous medium.....	1169
Air-hydrocarbon, subatmospheric pressures, burning velocities, Bunsen-burner method.....	7281
Air-hydrocarbon flames, carbon formation in thermodynamics.....	7279
Air-hydrogen-nitric oxide-nitrous oxide system, flammability characteristics.....	7073
Air injection, oil, secondary recovery.....	7763
Air injection projects, oil wells, effect on oil production.....	3057
experimental flowing.....	3054
Air jets, role, in mine ventilation.....	5032
Air lifts, description.....	3652
Air-methane-acetylene mixtures, flame temperatures.....	4128
Air-methane-hydrogen mixtures, flame temperatures.....	4128
Air-methane mixtures, explosibility, effect of temperature and pressure.....	1040
ignition temperatures, effect of water vapor.....	4119
Air-methane-oxygen mixtures, flame temperatures.....	4128
Air-methyl formate mixtures, explosive properties.....	4129
Air-mine gas mixture, recirculation in coal mines, with auxiliary fans.....	3109
Air-motor exhaust gas, carbon monoxide in, determination.....	7626
Air movement, physiological effect of high temperatures and humidities.....	6824
Air-natural gas flames, burning, turbulent, velocities.....	6540
Air-natural gas mixtures, ignition by heated metal bars.....	1476
ignition with methane, by induction coil sparks.....	5236
Air pollution, abatement.....	4927
accidents, Poza Rica, Mexico, data.....	4928
aluminum alloy processing, recovery of fumes and gases, electrostatic precipitators for, efficiency.....	4952
annual review.....	4915
aspects.....	4974
conference discussion.....	4918
automobile combustion products, Los Angeles County, study.....	4950
bibliography.....	433
Bureau of Mines work.....	386
by hydrogen sulfide, Poza Rica, Mexico.....	4979
catalytic combustion of odor-producing agents, role of oxygen.....	4920
contaminants and microsampling technique, Los Angeles Air Pollution Control District, study.....	4946
control.....	4913
annual review.....	4933
by recovering fire coal and sulfur.....	4905
collection and analysis of pollutants, methods, Los Angeles County.....	4934
Inclinators, design and use.....	1414
wood-burning, design comparisons.....	4942
progress.....	4923, 4964
scrubbing devices.....	4930
cupola, dust control, equipment.....	4959
data.....	4912, 4918
definition.....	385
determination equipment, research.....	4959
determination of impurities.....	6344
distribution of contaminants, work, progress.....	4941
dust collectors, for industrial plant.....	4956
dusts in stack effluents, determination, apparatus and method.....	4917
electric power plants (coal fuel) as source.....	5894
electrolytic refining of magnesium, chemical compound discharge, effect.....	4925
ferromanganese blast furnace, fumes disposal, study.....	4940
filter, use.....	4921
germanium, coal or ash as source, production.....	4947
gray-iron foundries, gas control, equipment requirements.....	4957
health correlation studies.....	4943
Hemion automatic air filter samples, measurement methods.....	4938
human bodies, thermal exchanges between.....	3814, 3815
industrial, data.....	4914
internal combustion engine exhaust fumes, oxidation by catalyst.....	4951
low-sulfur fuels, use, results.....	4960
measurement.....	415, 4931
mine refuse as source, problems, discussion.....	850
odor elimination, methods, Los Angeles area.....	4937
open-hearth furnace electrical precipitator, efficiency.....	4928
origin, catalytic action of nitrogen dioxide with light.....	4919
outlook.....	4939
oxidation of phenolphthalein to phenolphthalein, oxidant estimation.....	4935
prevention.....	384
problem.....	3770
purification symposium.....	4980
radioactive waste materials disposal, problems.....	4929
relation to water pollution.....	4970
research.....	4944, 4945
role of efficient burning equipment.....	4924
role of meteorological factors.....	4934
sanitary engineering aspects.....	4971
silicone-treated dust collectors, use.....	4932
smoke, discussion.....	4972
smoke prevention, trends.....	4973
smoke-scope, use.....	4949
spectrometric investigations of.....	2730
sulfur dioxide, control.....	602
sulfur recovery, from flue gases, reports.....	4948
U.S. technical conference, report.....	4954, 4955
Venturi scrubbers; use in fume removal and recovery.....	4961
Air pollution data, for laboratories.....	4953
Air preheaters, corrosion and deposits.....	806
design, effects of fuel characteristics, discussion.....	418
Air-propylene dichloride mixture, explosive properties.....	4130
Air-sand process, coal, cleaning.....	2708
Air separator, accurate, construction.....	6640
for powders, fine.....	6634

Item	Item
Air shaft, subsidence, Brownsville, Pa. 5801, 6498	Alkalinity, caustic, elimination, to prevent embrittlement crack- ing 585
Air splits, rearranging, relation to methane in air, discussion 1539	Alkane sulfides, isomeric, thermodynamic properties 3852
Air tester, gas flame as, review 8531	Alkane thiols, isomeric, thermodynamic properties 3852
Air-vapor mixtures, constant composition, apparatus for preparing 8535	Alkylcyclohexanes, low-temperature thermal data 3871
Air-water vapor-hydrogen mixtures, combustion and explosion hazards 8629	Alkynes, reactions with metal carbonyls 7435
Air-water vapor mixtures, carbon disulfide in, flammability 8630	Alkynes and dicobalt octacarbonyl, acetylenic dicobalt hexacar- bonyls revived from 3069
Airborne dust, coal-mine, control 3276	Allegheny County, air pollution, research 4944
Airdox, blasting with, hazards of 7742	Allen County, Kans., Humbolt-Chanute oil field, waterflood- ing 4037-4040
Airflow resistance of coal mine entries to through small orifices 6033	Allenes, reaction with dicobaltoctacarbonyl 3070
Airflow friction, determination in Moffat railroad tunnel 6037	Alloys, acid-resisting, use, in mine water 2104
Airplanes, use in mine rescue 322	colloidal behavior 1722
Airplane fuels, study 1713	electric melting 2944
Airplane transport, to Peruvian mines 8429	ingots, homogeneous, by consumable arc melting 500
Airships, helium for, production 7448	light, rare metals as constituents 4545
Airstreams, carbon in, combustion 4570	metallurgy, Bureau of Mines work 1732
Airways, metal mine, friction factors 6038	nickel in, determination 5957
size, economic 6028	nonferrous, vacuum distillation, experiments 7402, 7403
Alabama, Birmingham district, red iron mines, drainage relation to subsidence 1481	Alloy steel, embrittlement detector tests 6990
roof support 1487	manufacture, pilot plant adaptation 7428
slag, use 1532	Alloying, principles of 219
cool, ash correction formulas, use 3622	Alpha brass, internal friction, effect of cold work and annealing, discussion 6172
gasification, underground, conference 6968	Alpha Chi Sigma, safety program 6915
losses 2502	Alpha electrons, chemical effect of 4782
preparation, annual review 2800	Alpha manganese, specific heat, at low temperature 7237
coal mining, practices, discussion 6465	Alpha particles, chemical effects of 4782
Empire, Debarlehen Coal Corp. mine, washery water, bot- tling treatment 2811	gaseous ions of, chemical action 4802
flake graphite, wnr uses 5024	radon, in small spheres, mean effective path, chemical determi- nation 380
fire clay, annual review 5079	Alpha solid solution, copper-manganese-aluminum alloys 1774
Gorges, coal, underground gasification 2498, 2502, 2504	Alpha solid solution area, copper-manganese-aluminum system 1785
experiments 2001, 2063, 2065, 2068, 2494, 2499, 2501	copper-manganese-tin system 2775
graphite, briquetting, effect of tar content 7547	copper-manganese-zinc system 1782
effect of variable pressure 7547	Alum, iron-free, production 2896
in brass foundry, behavior 7538	Alumina, aluminum silicates as source, method, patent 3700
products, preparation, methods and cost 2810	anhydrous, adsorbent, in constituent analysis of asphalt, clay as source 3845
graphite schists, flotation for crucible flake 1245	patent 3700
iron ores, differential grinding 1296	production by lime-soda slinter method, discussion 1373
grinding, liberation of minerals 1259	dehydration, in aluminum production 7242
mine safety, plan 1124, 2500	heat of formation 5094
oil field brines, electrical resistivity of 3474	Hobart Butte as source 3905
shales, annual review 5076	in iron ores, discussion 4160
Alarins, coal mine, development and research 4019	low-grade domestic materials as source, Bureau of Mines work 1739
Alaska, Arctic slope, oil seepage 2009	production, by lime-soda slinter method, recovery of soda in 3251
coal, distillation assays, at low temperature 5980	Alumina-adsorption analysis, petroleum aromatics 5067
high-grade, resources 3135	Alumina gel, adsorption of vapors by 8114
washing 2913	Alumina-lime-silica system, reaction to mat glazes 8349
containing development 7783	Alumina ores, deposits, Bureau of Mines investigations 1720
gold mining industry, annual review 6285-6287	Aluminates, entropy 4376, 4378
lignite, use in power development 1636	heat capacity, at low temperature 4376, 4378
metals, annual review 6285-6287	Aluminate solutions, carbonated, viscosity of 2252
production 8368	Aluminous silicate refractories, analysis 466
mineral review, annual report 323, 5264, 6285-6287	Aluminous, annual review 181
national opportunity 1633	183, 1304, 1365, 1533, 2685, 3526, 3674, 3675, 8205
oil fields 2921	bauxite as source, annual review 868
presidential trip, report 7574	colorimetric determination, with aurintricarboxylic 6639
silver mining industry, annual review 6287	determination, analytical control methods, colorimetric proce- dures, precision and accuracy 6841
Uniat, oil production 370	hard spots 232
Yakob Island, high lights 1997	in bronzes, fluorometric determination 8204
Alberta, Canada, coal mines, explosions, prevention 6437	in metals, determination 1092
Hillcrest mine, explosion 6436	in minerals, fluorometric determination 8204
Alcohol; Fischer-Tropsch synthesis, discussion 6947	in mineral powders, spectrochemical determination with high- voltage direct-current arc 5806
formation from water gas, equilibrium 7317, 7319	in steels, fluorometric determination 8204
homologation of 8240	liquid, diffusion of solid copper in 193
in complex mixtures, determination by mass spectrometric method 4014	metallic, in commercial metal, determination 230
mass spectra 2758	melting 185, 218
production, oxo reactions 8242	furnaces for 182
Alcohol; source of ethylene 1647, 1648	improvement 217
synthesis, by hydrogenation of carbon monoxide 167	refractories 222
Alcohol-soluble matter, in pent 4070	production, dehydrating alumina 7252
Aldehydes, removal, from diesel exhaust gas 1699	review 6730
from exhaust, by sodium sulfite 2087	western clay as source, ammonium sulfate process 6733
Alconquin mine, Mont., manganese ore milling 67	uses, review 2895
Alcyclic structures, in coal 2110	with aurintricarboxylic, colorimetric determination 6639
Aliphatic nitrates, mixtures, analysis, refractometer 6558	Aluminum alloys, cerium in 2981
Aliphatic nitrate esters, in presence of aromatic nitrocompounds, estimation 3867	light, linear contraction 206
Alkalies, effect, on concrete drain tile 7272	shrinkage 206
on mineralogical and physical properties of aluminum oxide mixtures 7295	melting, improvement 217
use, in gas condensate wells, for corrosion control, tests 2045, 2050, 2051	iron pot 200
in portland cement, determination 582	furnaces for 182
Alkali-biotite, rare, data 3644	constitution of gas atmosphere in 229
Alkali-carbonate, separation from potassium sulfate, process, pat- ent 2125	pouring, effect of temperature 2947
Alkali-carbonate brines, removal of dissolved silica from 5313	Aluminum-alloy castings, cracks in 192
separation of sulfate and chloride from 2126	light, discussion 191
Alkali cyanides, in iron blast furnace, occurrence 4418	Aluminum alloy-No. 12, manufacture 195
Alkali earth carbonates, heat capacity, at low temperatures 130	Aluminum-alloy pistons, production, in permanent molds 228
Alkali soils, oil pipelines in, protection 667	Aluminum-alloy processing, recovery of fumes and gases, electro- static precipitators for, efficiency 4952
Alkali-soluble hydrosulfite, tar acids in, extraction, method, pat- ent 2999	Aluminum boride, monocrystals, microhardness 1442
Alkali water, hot, chrome ore in, relative solubility 3258	Aluminum castings, description 218
lead smelter slag in, relative solubility 3258	quality 225
quartz in, relative solubility 3258	Aluminum chloride anhydrous, heat of formation and hydration 1404
silicate filter grits in, relative solubility 3258	Aluminum-copper alloys, description 184
	light, foundry methods 205

	Item		Item
Aluminum fluoride, anhydrous, heat content, at high temperature.....	5774	Ammonia, oxidation to nitric acid, effect of acetylene.....	7619
entropy.....	4384	effect of phosphine and hydrogen sulfide.....	7618
heat capacity, at low temperatures.....	4384	synthesis, kinetics, rate.....	160
Aluminum foundries, casting losses.....	190	vapor pressure, effect of temperature.....	1045
scrap losses.....	186, 187	Ammonia-ammonia dissociation products mixtures, flame tem- peratures.....	4127
Aluminum furnaces, gas in analysis.....	231	Ammonia helium system, reactivity.....	4005
Aluminum heat conductor, description.....	3441	Ammonia plants, costs, study.....	7298
Aluminum industry, coal for electrodes in, market.....	1079	Ammonia-sodium system, reactivity.....	4005
refractories, metallurgical requirements.....	213	Ammonium aluminum sulfate, "anhydrous," heat of formation.....	8565
Aluminum-lithium hydride, hydrogen deuteride from.....	8236	specific heat, at low temperatures.....	7238
Aluminum-lithium-magnesium system, magnesium in.....	6892	Ammonium aluminum sulfate dodecahydrate, heat of formation.....	8565
Aluminum-manganese-copper alloys, alpha solid solution, prop- erties.....	1774	specific heat, at low temperatures.....	7238
Aluminum-manganese-copper system, alpha solid solution area.....	1785	Ammonium bisulfate, heat content, at high temperatures.....	7235, 7246
Aluminum metallography, description.....	208	Ammonium compounds, explosibility, investigation.....	7225-7227
etching and preparation of microsections.....	210	Ammonium crystallization, distribution of impurities.....	5872
feric sulfate as etching reagent.....	196	Ammonium nitrate, characteristics, research.....	5476
grain growth.....	211	detonation, effect of temperature.....	2045
ingots.....	209	explosibility.....	5485
recrystallization.....	211	effect of confinement.....	7226
Aluminum nitrate, hydrous, heat of formation.....	8568	effect of packing density.....	7227
specific heat, at low temperatures.....	7245	effect of temperature.....	4089

safety competitions, national	2604
Safety Division, work	2022, 3379
safety education	2612
safety promotion, industry	7993
safety studies, publications	3944
schist explosion, New London, Tex., study	5946
scrap metal data, relations with dealers filing	1335
shale, investigations	2872
shale oil, refining	4021
work review	4509
Sigma-Gamma Epsilon, relations with	2098
sponge-iron, production, plans	678
steel industry, relations	1747
stream pollution, investigations	4678, 6844
strontium, from domestic ores, studies	2534
subbituminous coal, gasification, developments	5990
synthetic fuels, liquid, demonstration plants	3093
investigations	1806, 2327
research	7472
Synthetic Fuels Demonstration Plant, high-pressure instruments	340
performance	6941
synthetic liquid fuel industry, Germany, report	630
tantalum, extractive metallurgy, research	3783
Technological Branch, work review	2056
thorium, exploration, report	6580
titanium, casting, developments	4843
fabrication, investigations	8156
metallurgy	8165
production	4843
titanium-nickel alloys, investigations	2310
tunnels; study of	2466
vehicular, ventilation, report	4446
visual aids, use in demonstrations	5921
volumeter, determining incombustible coal dust with	6754
war program	8404
wax oil mixtures, analysis, method, development	2526
work review	253, 819, 1305, 1317, 1832, 2215, 2508, 2524
zinc, reclamation instruments, development	6752
zirconium, casting, developments	6586
Bureau of Mines-American Gas Association, carbonization retort	2392
blending experiments	2351
carbonizing tests, correlation with coal analyses, discussion	7532, 7537
Bureau of Mines-Atomic Energy Commission, gas industry pro- gram	4432
Bureau of Mines course, on gas hazards, petroleum industry	6885
Bureau of Mines-West Virginia University, cooperative work	8135
Bureau of Mines-Western Petroleum Refiners Association, status of fuel stability, research	7281
Burners, burner, burning velocities, hydrocarbon mixtures	7282
quenching by ports, significance	3173
ethylene-air flames from, smoke limits of	3103
turbulent flames, flashback and blowoff limits	7278
cylindrical, burning-velocity measurement, comparison with slot burners	3174
flames from; stability limits, temperature dependence	59
flat-flame, low-temperature combustion, emission spectrums, comparisons	6073
gas, air entrainment in	2106
flashback; nature of	850
low pressure, use in oil-field boilers	3108
performance; prediction	3107
theory; calculation	6379
horizontal cyclone, discussion	7216
long-flame, coal furnaces, refractories service conditions	3182
noncircular-port, flame stabilization	3171, 3176
rectangular, flames from, blowoff	3182
short-burner, flame stabilization	7278
slot and cylindrical, burning velocity, measurements, comparison	4764, 8092
Burner flames; stability and structure	1002
Burnett apparatus, gas deviation determination, use	6537
Burning, turbulent, laminar wave concept, evidence for	6540
natural gas-air flames, velocities	6642
Burning characteristics, anthracite	644
Burning methods, waste in	5164
Burning, velocity, measurement, in spherical vessel	6163
pressure dependence, determination by spherical vessel method	

	Item
Butane, for gas enrichment, patent	5795
normal, critical constants	7104
vapor pressures	7104
effect of temperature	1047
Butane-butene-hydrogen equilibrium constants, relative value	4223
Butanethiol, chemical thermodynamic properties	5020
rotational conformations	5020
thermodynamic properties	7059
Buteneone vapor, effect on guinea pigs	9000
Butte, Mont., mines, ventilation, progress, review	9526
Butyl esters, from oil shale, constitution, determination	6005
Butylene, pentyl alcohols from, hydroformylation reactions	8256
Byproduct coke, production, developments	2240, 2363
Byproduct coke-oven practice, temperatures in	4908
Byproduct coke-oven wastes, stream pollution from	4177
Byproduct yields, effect of washing coal	2241, 2364

C

Cables, alternating current, grounding conductors in, induced voltages.	3408
armored electric, wellhead stuffing box for	7892
electric, coal mines, safe use and installation	8181
safety conference on	3943
underground use, precautions	5903
mine-power feeder, high voltage, installation	8183
trailing, flame-resistant	8185
safety in handling	3130
fire-resistant, coal mines; use and maintenance	8182
frame, grounding conductors in, replacement devices for, research	3412
rubber-sheathed, concentric-type, for mining machines, investigation	3952
description	3954
Cadmium, annual review	2579
4623, 8213, 8260, 8261, 8439-8442, 8739, 8418, 8419	
in dust, spectrochemical determination	5905
oxide cells	5101
separation from zinc concentrates, by fuming	4348
vapor pressure	8094
Cadmium aluminate, heat content, at high-temperatures	654
Cadmium malonate, entropy	4385
heat capacity, at low temperatures	4385
Cadmium oxide, combustion calorimetry	5089
heat capacity, at low temperatures	5338
heat of formation	5089, 7799
vapor pressure	3081
Cadmium silicate, heat of formation	7798
Cages, signaling from	6945
Calson operations, helium-oxygen atmosphere, value	6834
Calaveras County, Calif., Penn mine slag dump and mine water	8307
Calcium orthosilicate, crystalline, entropy	7772
heat capacity, at low temperatures	
Calcining, as grinding aid	6528
Calcite, optical, prospecting and mining, methods	5602
Calcium aluminate, entropy	4378
heat capacity, at low temperatures	4378
Calcium-aluminum oxides, crystalline, heats of formation	1463
Calcium borate, entropy	4333
heat capacity, at low temperatures	4333
heat content, at high temperatures	4390
Calcium carbide, desulfurization of pig iron with	464, 6383
heat content, at high temperatures	5382
specific heat, at low temperatures	4326
Calcium chloride, anhydrous, heat content, at high temperature	5390
specific heat, at low temperatures	4331
Calcium compounds; in clay, behavior	3885
Calcium ferrite, entropy	4377
heat capacity, at low temperatures	4377
heat content, at high temperatures	4377
Calcium fluoride, entropy	655
heat capacity, at low temperatures	7769
heat content, at high temperatures	7769
Calcium metal; use, bomb reduction of molybdenum trioxide	6542
Calcium malonate, heat capacity, at low temperature	2633
heat content, at high temperatures	7230
heat of formation	5448
Calcium nitrate, heat content, at high temperatures	7234
heat of formation	5467
specific heat, at low temperatures	8205
Calcium nitrate tetrahydrate, heat of formation	8307
Calcium orthosilicate, heat content at high temperatures	1469
Calcium oxide, from calcined magnesite, extraction	1979
Calcium oxide-silica-water system, properties	6649
Calcium silicate, entropy	7772
heat capacity, at low temperatures	7772
heat of formation	4374
Calcium sulfate, at boiler water temperatures, solubility	3260
heat of hydration	7388
reserves, physical chemistry	781
use in cement, setting	6649
Calcium sulfate-ammonium sulfate system, properties	2790
Calcium sulfate scale, prevention, high steam pressures	6995
Calcium sulfide, heat capacity, at low temperatures	133
Calcium sulfate, specific heat, at low temperatures	4332
Calcium thioarsenate, use as spray	963, 4267

Item		Item	
Calcium titanate, entropy	4390	Carbon, industrial data, review	4483
heat capacity, at low temperatures	4390	isotopic, chemical manipulation, techniques	4481
California; Argonaut gold mine, fire extinguishing	271	measurement, techniques	4481
fire rescue work	6135	on tungsten, surface migration	4461
Bald Eagle magnesite mine, discussion	7877	reduction of zinc oxide by	8043
Big Creek, tunneling operations	2829	structure, carbon monoxide as source, on cobalt, iron, and nickel	3730
bituminous sand and shale, as source of oil	7170	with carbon dioxide, reaction kinetics	2109
Calaveras County, Penn mine slag dump and mine water	8307	Carbon and manganese oxide, in molten-manganous chloride,	
carbonaceous ores, metallurgy of mother lode	4853	electrolysis	1121
electric-furnace pig iron, microscopic study	4610	Carbon and metal oxides, in vacuum, reactions	4550
Elk Hills field, helium, tracer studies	2767	Carbon and oxygen, on tungsten, surface reaction investigation,	
gas-generating apparatus	5783	field emission microscope	4460
gas-injection problems	4866	Carbon atoms, relation to hydrocarbons	7355
gasoline industry, annual review	3267	Carbon black, manufacture	6550
Oilroy, landslide, structural features	4519	channel process	5551
gold dredging, improved recovery methods	4603	disk and cylinder processes	5552
gold mining industry, annual review	6226	oxidation, production of mellitic acid; formation of intermediate	
iron ore deposits, investigations	4051	acids, nature of	6710
Los Angeles, air pollution, control, nonferrous industries, reduction of lead emissions	4922	properties	8107
Los Angeles Air Pollution Control District, air pollution, contaminants and microsampling technique, study	4946	surface complexes	162
Los Angeles area, air pollution, odor elimination, methods	4837	testing natural gas for	5554
Los Angeles County, air pollution, automobile combustion products, study	4950	uses	6107
control, collection and analysis of pollutants, methods	4936	water vapor on, adsorption	2101
silicone-treated dust collectors, use	4832	Carbon black industry, economic phases	3792
Los Angeles fire department, Bureau of Fire Protection, dangerous chemicals code, review	4094	survey	5549
metal production, annual review	6272, 6290	Carbon-black particles, measurement	101
minerals, annual review	6288, 6289, 6301	Carbon chlorides, from natural gas	4096
mineral review, annual report	6266	Carbon compounds, bomb calorimetric data, reduction to standard state	3856
oil, production, law of equal expectations in	496	Carbon consumption, in blast furnace, relation to material smelted	4415
secondary recovery	4871	Carbon dioxide, absorption, by amines	3683
viscous, transmitting through pipe lines	665	use of hot carbonate solutions	827
oil fields, accidents	5357	by potassium carbonate solution	626
gas lift pumping	5358	by tetramine	3689
mechanical installations for	5358	by triethanolamine	3689
petroleum industry, safety, annual review	5354	accumulation in geologic structures, discussion	6486
pig iron, from electric furnace, microscopic study	4899	agitator absorber for	604
pipelines	471	at North and South McCallum	6415
silver-mining industry, annual review	5226	coke in, reactivity, determination	8068
strategic minerals, production	5292	determining by turbidimeter	4108
war mineral industry, summary	6541	extinguishing ethylene dichloride flames	7312
Wilmington, crude oil, identification of methylthiophene in	7719	in gas mixtures, determination and recording	625, 626
petroleum, nitrogen compounds in, distribution	3533	separation from, patent	6486, 7978
Calorimeter, hydrofluoric-acid-solution use	7798	in geologic structures, accumulation	571
Calorimeter, modified, for high temperature	7389	in steam, effect of operating pressure	2770
Calorimeter shield control, adiabatic, automatic description	8034	in top gas, controlling furnace burden by	5813
Calorimetry, low-temperature, method, Bartlesville station, Bureau of Mines	3869	oxidation of zinc vapor	2109
rotating bomb	8095	reaction with hydrocarbons and steam, in synthesis gas production	1104
Calumet mine, mine-water neutralizing plant	7809	relation to coke	7290
Cannas County, Idaho, Camp Creek radioactive placer area	6594	separation from gas mixtures, patent	522, 626
Camera, use for studies of explosives phenomena	2928	thermodynamic functions	4226
Camp Creek, Idaho, mineral placer area, radioactive	6591	Carbon dioxide adsorption system, carbonate-caustic ratio, determination	7311
Canada, air pollution control, annual review	4033	Carbon dioxide and nitrogen, extinguishing ethylene flames	4106
Alberta, coal, gas producer trials with	627	Carbon dioxide and oxygen, elimination of carbon monoxide from blood with	6831
coal mines, explosions, prevention	9437	Carbon dioxide sublimation point, calibration of resistance thermometers at	4873
Hillcrest mine, explosion	6436	Carbon disulfide, allowable concentration, United States	8684
American coal market in	825	In air-water vapor mixtures, flammability	8030
coal; investigations, discussion	2357	Iodometric determination	5222
crude oils, discoveries and refining properties	5068	Carbon drill steel, round, testing	6712
graphite, in brass foundry practice, behavior	7538	Carbon filament, methane, thermal decomposition of, use	7493
metal mines, rock bolting practices	7701	Carbon-iron alloys, graphitization	8340
mines, roof bolting	7702	Carbon-molybdenum-hydrogen system, equilibrium measurements	972
western, coal mines; gas in, instantaneous outburst, origin	6452	Carbon monoxide, action on cobalt-thoria-kieselguhr, X-ray diffraction studies	3719, 3727
Cannel coal, hydrogenation and petrography	2555	addition to acetylene dicobalt hexacarbonyl new complex	7445
Capillary lamp; in liquid flow along flat plates	1137	allowable concentration, United States	6956
Carbides, crystalline, specific heat, at low temperatures	4319	anthracite oxidation, liberation and relation to ignition temperature	7080
data	3702	carburization of iron oxide with	1318
Hägg, in used catalysts, Fischer-Tropsch synthesis, thermomagnetic determination	3714	catalyst, for methane production	6880
heat contents	1467	catalytic conversion of, patent	1526
heat of formation	5092	collection and preservation of blood samples for determining	6448
Isothermal decomposition of, in carburized catalyst, Fischer-Tropsch synthesis	3723	compressed	7230
storage, with explosives	5499	constituent of producer gas, for zinc distillation furnace, value	6518
Carbide lamps, brass, hazards	5482	Carbon monoxide, deposits on cobalt, iron, and nickel, structure of carbon	3730
Carbiding, kinetics, Fischer-Tropsch synthesis, cobalt catalysts	8209	disintegration of refractory brick by	8617
Carbon, activated, for sugar decolorization	3025	distribution in atmosphere, vehicular tunnels, experimental mine, details of tests	4283
amorphous, tetrahedral structures in	2113	effect on small animals, experiments	1054
atomic number, relation to boiling temperature of petroleum-sulfur mixtures	2006	encyclopedic description	8510
determination	1721	enriched in C ¹³ , discussion	6134
diffusion through molten iron	3730	equilibrium with methanol and hydrogen	7320
gasification rate, pressure dependence	8150	exposure to, medical study	7264, 7265
granular resistor, resistivities	8320	physiological effect	6839, 6845
graphitic, determination	7140	from natural gas burners, hazards	973, 4122
In air streams, combustion	4570	hazards	4258
In coal, classification	7146	Holland tunnel, men exposed to, medical study	7264, 7265
In coke, sulfur held by, at high temperature, physico-chemical study	6185	hydrogenation, synthesis of alcohol by	167
In cyanide solutions, precipitating action	6238	synthesis of liquid fuels, process	7800
In hydrocarbon-air flames, formation, thermodynamics	7270	thermodynamics	154
In liquid iron, effect on activity of sulfur	6424	In air, determination; pyrolytic acid method	6943
In open-hearth steel samples, determination	6569	In air, motor exhaust gas as source, determination	7626
In petroleum distillates, determination, lamp technique	7269		
In steel, magnetic determination	6614, 6620

		titanium, for electromechanical purposes.....	4006
		Ceramic bodies, firing, heat requirements.....	6083-1
		Ceramic industry, coal in, uses, discussion.....	5520
		coal properties, effect.....	6316

Item	Item
Ceramic kilns, description.....	1845
heat balance.....	5162
sulfur dioxide from gases of, absorption by ceramic ware, chemical study.....	3982
Ceramic material, machinable, production methods, patent.....	1357
Ceramic minerals, calculation, factors for.....	7294
Ceramic powders, size distribution, particle-size air analysis.....	6651
Ceramic products, firing, coal for, selection, factors.....	6512
Ceramic tests, clay, Pacific Northwest deposits.....	7293
Ceramic ware, absorption of sulfur dioxide, from gases of ceramic kilns, chemical study.....	3982
oxidation during firing.....	3984-3989
Cerium, aluminum alloys as source.....	2961
Cesium biotite, data.....	3640
Cetane number, determination, size reduction of samples.....	1181
Ceylon, graphite, in brass foundry practice, behavior.....	7538
Chain destruction, effect of wall efficiency.....	8088
Chain initiation, mechanism of, in hydrogen-oxygen thermal reaction.....	4756
Chalcocite, relation to bornite, Virginia District.....	4008
Chalcopyrite, in chalcopyrite-pyrrhotite ores, flotation.....	1267
Chalcopyrite-pyrrhotite ores, flotation.....	1268
Chalk, Cretaceous, origin, relation to coccolithophores.....	2763
Change houses, for workmen.....	1321
Channel process, carbon black manufacture.....	5551
Char, carbohydrate, infrared spectra.....	2742
fluidized, briquetting properties.....	4599
for power production.....	5959
pipeline gas from, by Lurgi process, economic outlook.....	4242
substitute for coal, producing high-temperature coke, discussion.....	2365
Charcoal, adsorption of metals by.....	3138
as gold precipitant in flotation.....	8000
oxygen complexes on.....	8220
surface complexes.....	163
use, recovery of gasoline.....	1042
Charge, distribution, in electrostatic separation.....	2677
Charleston, W. Va., Blaine Island, pulverized-coal fired slag-tap steam boiler, heat absorption, variation.....	5898
Chemicals, dangerous, code, review.....	4094
coal as source.....	6110, 6042
Fischer-Tropsch synthesis as source.....	6878
hazards, American Chemical Society committee report.....	6494
in coal.....	7463
organic, conversion from coal, research and development.....	7488
use, in flotation.....	6278
