

A SELECTED BIBLIOGRAPHY OF COAL GASIFICATION

by

Robert M. Busche,^{1/} Howard R. Batchelder,^{1/}
and Willard P. Armstrong^{2/}

CONTENTS

	<u>Page</u>
Introduction and summary	1
Thermodynamics of gasification	1
Reaction kinetics: General considerations	4
Mathematical analysis of gasification	5
Reaction of oxygen with carbon	7
Reaction of oxygen with carbon monoxide	13
Reaction of oxygen with hydrogen	14
Reaction of carbon with steam	15
Reaction of carbon with carbon dioxide	18
Water-gas shift reaction	19
Surface catalysts for the gasification reactions	20
Reactivity	21
Particle size, dynamics, and composition	22
Heat-transfer considerations	24
Gasifier design and operation	26
