Figure E5. Combined wood, aluminum, ferrous, food waste, glass fraction in NRG RDF.

Figure E6. Forsberg air-classifier used for RDF cleaning and biomass entrainment tests.

Figure E7. Upgraded −4-inch RDF from air-classifier cleaning.

Figure E8. Combustible fraction of heavies from air-classifier cleaning of −4-inch RDF.

Figure E9. Noncombustible fraction of heavies from air-classifier cleaning of −4-inch RDF.

Figure E10. Noncombustible fraction of lights from air-classifier cleaning of −4-inch RDF.
