HEAT TRANSFER INVESTIGATIONS IN A SLURRY BUBBLE COLUMN

FINAL REPORT

SUPPORTED BY: U.S. Department of Energy
Pittsburgh Energy Technology Center
Post Office Box 10940
Pittsburgh, Pennsylvania 15236

PROJECT MANAGER: Mr. George Cinquegrane
(412 - 892 - 4781)

INSTITUTION: Department of Chemical Engineering
The University of Illinois at Chicago
Box 4348
Chicago, IL 60680, U.S.A.

PRINCIPAL INVESTIGATOR: Professor S.C. Saxena
(312 - 996 - 2341)

OTHER INVESTIGATORS:
Dr. N. S. Rao
Dr. R.Vadivel
Mr. S. Shrivastav
Mr. A. C. Saxena
Mr. B. B. Patel
Mr. P. R.Thimmapuram
Mr. M. Y. Kagzi
Mr. I. A. Khan
and
Dr. A. K. Verma

Prepared for the United States Department of Energy Under Contract No.
DE - AC22 - 86PC90008.
Contract Period September 1986 - December 1990.

FEBRUARY 1991

LIST OF CONTENTS

		Page
OBJECTIVES OF THE PROJECT		3
ABSTRACT		4
1.	EXECUTIVE SUMMARY	5
2.	INTRODUCTION	20
3.	EXPERIMENTAL FACILITIES	30
3.1	Small Bubble Column (0.108m i.d.)	30
3.1.1	Heat Transfer Internals and Thermocouple Probes	35
3.1.2	Data Acquisition and Analysis System	41
3.2	Large Bubble Column (0.305m i.d.)	44
3.2.1	Heat Transfer Internals and Radial Thermocouple Probes	49
3.2.2	Temperature Controllers, Data Acquisition and Processing systems	63
3.3	Gas Supply System	63
3.4	Powders and Their Properties	66
4.	EXPERIMENTAL DATA AND RESULTS	75
4.1	Fluids and Their Properties	75
4.2	Slurries and Their Properties	75
4.3	Gas Holdup Data for the Small Column	77
4.3.1	Operating Mode and a Typical Procedure	77
4.3.2	Air-Water System	78
4.3.3	Nitrogen-Therminol System	82
4.3.4	Air-Water-Red Iron Oxide System	88
4.3.5	Air-Water-Glass Bead System	92
4.3.6	Air-Water-Magnetite System	92
4.3.7	Nitrogen-Therminol-Red Iron Oxide System	102
4.3.8	Nitrogen-Therminol-Magnetite System	109
4.4	Heat Transfer Data for the Small Column	112
4.4.1	Operating Mode and a Typical Procedure	112
4.4.2	Air-Water System	115
4.4.3	Nitrogen-Therminol System	127
4.4.4	Air-Water-Red Iron Oxide System	127
4.4.5	Air-Water-Glass Bead System	133
4.4.6	Air-Water-Magnetite System	137
4.4.7	Nitrogen-Therminol-Red Iron Oxide System	147
4.4.8	Nitrogen-Therminol-Magnetite System	153

4.5 Gas Holdup Data for the Large Column . . . 153
4.5.1 Operating Mode and a Typical Procedure . . . 153
4.5.2 Air-Water System . . . 158
4.5.3 Nitrogen-Therminol System . . . 165
4.5.4 Air-Water-Silica Sand System . . . 172
4.5.5 Air-Water-Glass Bead System . . . 172
4.5.6 Air-Water-Magnetite System . . . 187
4.5.7 Nitogen-Therminol-Magnetite System . . . 187
4.6 Heat Transfer Data for the Large Column . . . 192
4.6.1 Operating Mode and Typical Procedure . . . 192
4.6.2 Air-Water System . . . 194
4.6.3 Nitrogen-Therminol System . . . 203
4.6.4 Air-Water-Silica Sand System . . . 207
4.6.5 Air-Water-Glass Bead System . . . 207
4.6.6 Air-Water-Magnetite System . . . 218
4.6.7 Nitrogen-Therminol-Magnetite System . . . 223

5. DISCUSSION OF EXPERIMENT AND THEORY: GAS HOLDUP . . . 230

5.1 Available Data and Correlations for Two-Phase Systems . . . 230
5.2 Available Data and Correlations for Three-Phase Systems . . . 234
5.3 Comparison of Present Two-Phase Data with Theory . . . 236
5.4 Comparison of Present Three-Phase Data with Theory . . . 257
5.5 Conclusions and Recommendations . . . 273

6. DISCUSSION OF EXPERIMENT AND THEORY: HEAT TRANSFER . . . 276

6.1 Available Data and Correlations for Two-Phase Systems . . . 276
6.2 Available Data and Correlations for Three-Phase System . . . 283
6.3 Comparison of Present Two-Phase Data with Theory . . . 290
6.4 Comparison of Present Three-Phase Data with Theory . . . 303
6.5 Conclusions and Recommendations . . . 339

7. GENERAL CONCLUSIONS AND RECOMENDATIONS FOR FUTURE WORK . . . 345

8. NOMENCLATURE . . . 359

9. REFERENCES . . . 364

10. LIST OF FIGURES . . . 375

11. LIST OF TABLES . . . 389

12. ACKNOWLEDGEMENTS . . . 395
