

THE HYDROGENATION OF CARBON MONOXIDE ON COBALT CATALYSTS

PROEFSCHRIFT

TER VERKRIJGING VAN DE GRAAD VAN DOCTOR IN DE
TECHNISCHE WETENSCHAPPEN AAN DE TECHNISCHE
HOOGESCHOOL EINDHOVEN, OP GEZAG VAN DE
RECTOR MAGNIFICUS, PROF. IR. J. ERKELENS, VOOR
EEN COMMISSIE AANGEWEEZEN DOOR HET COLLEGE
VAN DEKANEN IN HET OPENBAAR TE VERDEDIGEN OP
VRIJDAG 7 SEPTEMBER 1979 TE 16.00 UUR

DOOR

ANNA OUTI INKERI RAUTAVUOMA

GEBOREN TE LAUKAA, FINLAND

Dit proefschrift is goedgekeurd door de promotoren

Prof,drs. H.S. van der Baan

en

Dr. V. Ponec

I S Ä L L E
(to my father)

"The fear of the Lord is the beginning of wisdom;
a good understanding have all those who practise it".
from Psalm 110 (RSV)

Contents

1. INTRODUCTION	
1.1. Coal conversion	1
1.2. The Fischer-Tropsch synthesis	3
1.3. Mechanisms proposed for the Fischer-Tropsch synthesis	4
1.4. The present state of the art	6
1.5. The aim and outline of this thesis	9
2. APPARATUS AND ANALYSIS	
2.1. Introduction	11
2.2. The reaction system	11
2.2.1. Flow scheme and reactor	12
2.2.2. Analysis	13
2.2.3. Characterization of the flow reactor	15
2.3. The thermobalance	15
2.4. The adsorption apparatus	16
2.5. Definitions	17
2.5.1. Rates	18
2.5.2. Product distribution and selectivities	18
3. PREPARATION AND CHARACTERIZATION OF THE CATALYSTS	
3.1. Introduction	21
3.2. Preparation of the catalysts	22
3.3. Crystal structure of the catalysts	23
3.4. Reduction of the catalysts	25
3.4.1. Experimental	25
3.4.2. Reduction by hydrogen	26
3.4.3. Reduction by carbon monoxide	37
3.4.4. Reduction of Co_3O_4 by mixtures of hydrogen and carbon monoxide	41
3.5. Adsorption of hydrogen and carbon monoxide	42

4. ACTIVITY AND SELECTIVITY OF COBALT CATALYSTS	
4.1. Introduction	44
4.2. Standard experiments	45
4.2.1. Cobalt on alumina	45
4.2.2. Unsupported cobalt	46
4.2.3. Discussion	48
4.3. Influence of the hydrogen and carbon monoxide concentrations	49
4.4. Influence of the temperature	54
4.4.1. Cobalt on alumina	54
4.4.2. Unsupported cobalt	56
4.5. Influence of various catalyst treatments	57
4.5.1. Cobalt on alumina	57
4.5.2. Unsupported cobalt	63
4.6. Other cobalt catalysts	65
4.7. Discussion	66
5. FORMATION OF CARBONACEOUS SPECIES	
5.1. Introduction	71
5.2. Carbonization followed in the thermobalance	72
5.2.1. Experimental	72
5.2.2. Carbonization by carbon monoxide	73
5.2.3. Carbonization by synthesis gas	80
5.2.4. Discussion	82
5.3. Flushing of the catalysts after the Fischer-Tropsch synthesis	85
5.3.1. Introduction	85
5.3.2. Experimental	86
5.3.3. Flushing with hydrogen	86
5.3.4. Flushing with helium	89
5.3.5. Discussion	90

6. KINETICS	
6.1. Introduction	92
6.2. Reaction orders	93
6.2.1. Experimental	93
6.2.2. Overall orders	94
6.2.3. Orders of various products	97
6.3. Influence of the residence time	100
6.4. Apparent energies of activation	101
6.5. Discussion	103
6.5.1. Overall orders of reaction	103
6.5.2. Initiation	107
6.5.3. Chain growth	115
6.5.4. Reaction models	118
6.5.5. Olefin-paraffin ratio	122
7. FINAL DISCUSSION	
7.1. Initiation	126
7.2. Chain growth	130
7.3. Termination	133
LITERATURE	135
APPENDIX: Equations used in model calculations	143
LIST OF SYMBOLS	147
SUMMARY	149
YHTEENVETO (Summary in Finnish)	151
SAMENVATTING (Summary in Dutch)	153
CURRICULUM VITAE	156
ACKNOWLEDGEMENTS	157
