

INDEX - MICROFILM REEL 249
(Original designation BM-34)

List of Translations Prepared by
Ministry of Fuel and Power

<u>Document Number</u>	<u>Title</u>	<u>CIOS Reference No.</u>
F.D. 2874/46 It. 6	Copy of ZdM specification German Navy Lubricating oils.	3996/41
F.D. 2874/46 It. 10	Process for the manufacture of a burner fuel from acid tar.	3996/30/301 No. 45
F.D. 2874/46 It. 34	<u>DVL Lubricant Conference</u> About the Ageing of Oil and its change in use.	3996/69 pp. 5-27 Pt. 11
F.D. 2874/46 It. 34	The chemistry of the ageing of hydrocarbon oils.	pp. 29-40
F.D. 2874/46 It. 34	Tests on piston-ring stick- ing in the NSU engine.	pp. 183-190
F.D. 2874/46 It. 34	The testing of aero engine oils in the DKW engine.	pp. 191-203

T.O.M. Reel 249

<u>Document Number</u>	<u>Title</u>	<u>CIOS Reference No.</u>
F.D. 2874/46 It. 34	Application of the test results to practical conditions.	pp. 237-242
F.D. 2874/46 It. 34	Discussion after the lectures by Philippovich Morghen, Gieszman.	pp. 243-267
F.D. 2874/46 It. 35	The fundamental principles of the process of lubrication.	3996/70 pp. 15-23
F.D. 2874/46 It. 35	On the orientation of molecules in liquids and their mechanical properties.	pp. 23-41
F.D. 2874/46 It. 35	On the orientation of molecules at boundary surfaces, especially on metallic boundary surfaces	pp. 43-59
F.D. 2874/46 It. 35	The nature of wear.	pp. 63-75
F.D. 2874/46 It. 35	Heating friction and abrasion under conditions of boundary lubrication and their relation to oiliness by Reg. - Rat.	pp. 91-107
F.D. 2874/46 It. 35	Boundary friction of chemically defined substances by Dr. Eicke Reich Physical-Chemical Institute.	pp. 107-111
F.D. 2874/46 It. 35	Static friction and oiliness.	pp. 149-158
F.D. 2874/46 It. 35	The oil test apparatus of the Z.F.	pp. 185-190
F.D. 2874/46 It. 35	Test methods and the influence of lubricating oils in false Brinelling of Ball and Roller Bearings.	3996/30.01-70 pp. 191-202

T.O.M. Reel 249

<u>Document Number</u>	<u>Title</u>	<u>CIOS Reference No.</u>
F.D. 2874/46 It. 35	Investigation of lubricants in the I.G. cold box,	pp. 245-270
F.D. 2874/46 It. 35	The behaviour of lubricating oils at low temperature.	pp. 271-286
F.D. 2874/46 It. 35	Test on the low temperature behaviour of lubricating greases.	pp. 287-299
F.D. 2874/46 It. 35	Viscosity of lubricating oils and the starting-up of engines at low temperatures.	pp. 299-313
F.D. 2874/46 It. 35	A short summary of discussions.	pp. 313-333
F.D. 2874/46 It. 35	Session on 12.12.41. Lectures: Buske; Bartel, Halder, Soden.	pp. 334-352
F.D. 2875/46 It. 13	Improvement of the ageing stability of synthetic Brightstock and aviation oils by co-polymerisation of distillates cracked in the vapour phase, with aromatics or aromatic-rich fractions.	3996/147
F.D. 2876/46 It. 33	A process for producing fluids with physical characteristics which are independent of temperature over a wide range.	U.M. 757
F.D. 2876/46 It. 50	On the constitution and properties of lubricating oils and on the change through oxidation.	U.M. 518

T.O.M. Reel 249

<u>Document Number</u>	<u>Title</u>	<u>CIOS Reference No.</u>
F.D. 2876/46 It. 53	Oil testsco-operative programme commissioned by the DVL.	F.B. 300
F.D. 2876/46 It. 60	Determination of the thermal stability of various aviation oils.	F.B. 912
F.D. 2876/46 It. 62	Physico-chemical investigations into the combustion process in the engine.	F.B. 952
F.D. 2876/46 It. 64	The properties of safety fuels.	F.B. 1074
F.D. 2876/46 It. 65	The chemistry of deposit formation in hydrocarbon oils.	F.B. 1077
F.D. 2876/46 It. 66	Tests on a synthetic oil of the Ruhrchemie A.G. in the liquid cooled (Heissgekühlt) single-cylinder test engine.	F.B. 804
F.D. 2876/46 It. 67	The low temperature behaviour of lubricating oils.	F.B. 1106
F.D. 2876/46 It. 69	Measuring knocking by the DVL pressure acceleration method.	F.B. 1150
F.D. 2876/46 It. 71	The DVL blow-by method for testing lubricants.	F.B. 1244
F.D. 2876/46 It. 73	An exact and rapid method for the determination of lead in fuels.	F.B. 1292

T.C.M. Reel 249

<u>Document Number</u>	<u>Title</u>	<u>CIOS Reference No.</u>
F.D. 2876/46 It. 75	On the behaviour of greases Diesel fuels, instrument oils and brake fluids at low temperatures.	F.B. 1331
F.D. 2876/46 It. 79	Determination of the lead tetraethyl content of fuels by means of X-ray adsorption.	F.B. 1476
F.D. 2876/46 It. 82	Influence of varied valve overlaps on various fuels in the DB 601 engine.	F.B. 1610 pp. 20-29
F.D. 2876/46 It. 83	The influence of the valve overlap on the knock-limit of various fuels in the DB 601 engine.	F.B. 1657
F.D. 2876/46 It. 86	The influence of various oils on the knock limit curve of aromatic fuels.	F.B. 1722
F.D. 2876/46 It. 88	Extension of the FKFS rapid method for determining the lead tetraethyl content of fuels.	F.B. 1859
F.D. 2876/46 It. 89	Different knock behaviour of fuels of different chemical structure in the engines BMW 132 N and DB 601E.	F.B. 1869
F.D. 2876/46 It. 90	The rating of fuels on their tendency to vapour-lock.	F.B. 1905
F.D. 2876/46 It. 97	DVL report on the conference on knock characteristics and storage of fuels (pp. 65-75) 16, 17 June 1941.	NID 24-PG 25402

T.O.M. Reel 249

<u>Document Number</u>	<u>Title</u>	<u>CIOS Reference No.</u>
F.D. 2876/46 It. 97	DVL Report on the conference on knock characteristics and storage of fuels. 16, 17 June 1941.	NID 24-PG 25402 pp. 83-84
F.D. 2876/46 It. 97	"	pp. 85-90
F.D. 2876/46 It. 97	"	pp. 111-112
F.D. 2876/46 It. 97	"	p. 118 to end
F.D. 2877/46 It. 3	Improvement of low temperature starting capacity.	NID/PG/25409
F.D. 2877/46 It. 9	Laboratory test method for the ageing of lubricants.	2744-30/5.01 Doc. 4 pt.
F.D. 2877/46 It. 12	Specification for fuel gas.	2744-30/5.05 Doc. 12.
F.D. 2877/46 It. 14	Analytical methods. Comparative investigations at the B.V.	2744-30/5.05 Doc. 23
F.D. 2877/46 It. 23	Tar oil, and the use of tar oil and crude oil in gas turbines for the Luftwaffe.	3441-30/5.01-76
F.D. 2877/46 It. 30	The construction of an apparatus for determining the critical temperature for vapour-lock of gasoline (abreisstemperatur), in aero-engines.	3445-30/5.01-58
F.D. 2877/46 It. 31	Grading of fuels with respect to vapor locks.	3445/58
F.D. 2877/46 It. 55	Process for production of polymerisation products of tetrahydrofurane.	Miscellaneous

T.O.M. Reel 249

<u>Document Number</u>	<u>Title</u>	<u>CIOS Reference No.</u>
F.D. 2877/46 It. 53	Extract from "Report on more recent work of the Institute" compiled by Dr. Phil. A.v. Philippovich.	Miscellaneous

Documents translated not included in the Document List

<u>CIOS Reference Number</u>	<u>Title</u>
F.D. 4975/45 - Folder III	On the Conference of the Ministry of Economic Expansion of the 8th and 9th July 1941
F.D. 4975/45 - Folder XII	Demand and supply of iso-butyl oils 1944.
F.D. 4975/45 - Folder XIII	Building certificates for the expansion of the Ester oil plants.
F.D. 4975/45 - Folder XXII	The plenipotentiary for special problems of chemical production.
F.D. 4975/45 - Folder XIV (Part of Folder XIII reappears here).	(Diagram) Extension of Ester Oil III to 21,400 tons per annum.
F.D. 4975/45 - Folder XXVIII	Synthetic Plant Auschwitz.
F.D. 4975/45 - Folder XXXI	Research and development problems under investigation.
F.D. 4975/45 - Folder XXXII	The replacement of "Kogasin" by other basic materials for Sulfo-chlorination - report for the "Waro" experts' conference 28.3.44.

<u>CIOS Reference Number</u>	<u>Title</u>
F.D. 5616/45	"Synopsis of cold-resistant lubricants.
G.D.C. Unit No. 10 Serial 10,105 German Academy of Aeronautical Research, 1939 Vol. 9, pp. 133-168.	The physico-chemical basis of combustion in engines.
G.D.C. 10/10,228	Atomic-physical changes in the sliding of metal surfaces.
G.D.C. 10/10,314	Physico-Molecular Processes in Lubrication.
3979/105	Examination of Austrian Petroleum.
3979/109	Laboratory experiments for obtaining adipic acid and alkyl adipic acids.
<u>Miscellaneous</u> M.T.Z. Feb. 1943 pp: 41-46.	Engine and physical investi- gations into the nature of knock.
<u>Miscellaneous</u>	German organisation of Fuel Research and Development.
<u>Miscellaneous</u>	C.P.V.A. Report No..9 (Unclassified). The develop- ment of a method for the preparation of polyxol greases.
<u>Miscellaneous</u>	Description and working in- structions for the Ruhrchemie vapour lock apparatus.
<u>Miscellaneous</u>	FIAT 873. The Self-ignition reaction of hydrocarbons with brief induction times.
Microfilm 135. At. 11	On the principle of lubricat- ing oil - mixed polymerisation.

T.O.M. Reel 249

<u>CIOS Reference Number</u>	<u>Title</u>
Microfilm 135. At. 111	Mixed polymerisation of SS oil with mineral oil.
Microfilm 135. At. VI	Description of the lubricating oil plant Rheinpreussen.
Microfilm 135. At. VIII	The scientific principles of the synthesis of lubricants.
Microfilm 135. At. X.	Ester oils.
Microfilm 135. At. XI	Esters as lubricants.
